**Now in my opinion the most important thing  
is where you will live**

## Family selection

Families that accept students under the cultural exchange program may be different. These may be families who are engaged in agriculture and live in the village, or there may be families who live in the city, families with and without children, as well as families with one parent. A family that plans to accept an exchange student is preparing for this very seriously and is doing everything in its power to make the student feel at home. The participant of the cultural exchange program becomes almost a full member of the host family, and the family also hopes that the student will actively participate in the activities and daily life of the family.
