

The difference between
online and offline
Quiz games

Easy Quizy

Online quizzes are gaining popularity **every day**. There are quite a few reasons for this. This is both the convenience of access and the opportunity to meet new people who are also passionate about their favorite game.

The game in **online** format is not much different from visiting **offline** events, but it also has its own unique features:

- you can play from anywhere in the world;
- players are only required to have a stable Internet connection;
- you can gather relatives or friends living in other countries for a common occupation;
- no need to waste time on a trip to the venue, which further facilitates access to the game.

Our **online** quiz takes place according to the following scenario:

- formation of teams;
- connection to the game, start;
- interesting questions and a set of indescribable emotions;
- scoring the points;
- determination of winners;

Online quizzes are held in various forms:

- **classic**, which contains questions from a variety of fields of knowledge;
- **themed**, dedicated to music, movies, art, hobbies, etc.

In any case, to win the online quiz, it is not so much knowledge that is important, as **ingenuity and erudition**. It is important to note that while playing, you fully immerse yourself in the appropriate environment, distract yourself from everyday affairs and fully relax, while training your intellectual abilities.

Excitement, bright and **unforgettable** emotions, a cheerful company of like-minded people or new acquaintances are not all the advantages to gain access to which it is enough to make a couple of mouse clicks.
