

Constant doubts

It's not good to always doubt things and people. When you doubt too much, it can make things worse and even cause people to act dishonestly towards you. Instead, it's better to trust people and work with really good experts when starting a business. It's also important to invest in things that will make you more money, instead of just keeping your money in one place where it might get lost. So, the main idea is to be confident, trust people, work with the best, and make smart investments.

- Let's look at this story. It is about a beggar who sees a king in a golden carriage and believes that his life will change for the better. However, when the king asks him what he has to offer, the beggar is surprised and unsure of what to do. In the end, he gives the king a single grain of rice, and the king accepts it graciously and continues on his journey. Later, the beggar discovers that one of the grains of rice was actually a grain of gold, and he regrets not giving more.
- This story teaches us that it's important to take advantage of opportunities when they come our way, even if they seem small or insignificant. The beggar had a chance to offer something to the king, but he hesitated and only gave a small amount. If he had given more, he might have received more in return. It also shows that we should not be too quick to judge the sincerity of others, and we should trust that good things can happen to us if we take action and have faith.

Experts emphasize that the importance of creating multiple streams of income instead of relying solely on one's salary in order to become wealthy and successful. Experts suggest four areas for investment: cash in the account, stocks and funds, real estate, and participation in third-party business. It is also recommended to divide a big goal into smaller achievable goals to make the path to success more manageable. Additionally, managing oneself, taking action, and controlling negative emotions are key to achieving one's plans. Overall, the experts emphasize the importance of financial planning and self-discipline in achieving success.
