

Project Presentation

ONLISH

Project Team:

Video Maker: Igor

Cameraman: Elmir

**Presentation: Roman, Eldar,
Adam and Valery**

**Shopper makers: Zarina,
Eva, Tatyana and Nurshash**

Course: Zarina

**We came up with
the idea to make
shoppers.**

ONLISH

A shopper is a reusable bag that can be used for various purposes: for shopping, carrying goods, books, for school. It is very convenient and eco-friendly because it reduces the use of plastic bags.

ONLISH

ONLISH

Our goals: to make the world cleaner, to help people change from plastic bags to shoppers, to inform people about the shoppers importance and how their role in saving the enviroment.

Our objectives: preservation of the environment and switching from plastic bags to shopping bags

For the making
shoppers we chose
burlap because we
think that this fabric
belongs to one of the
most eco-friendly
fabrics

There is an
inscription made
of environmentally
friendly paint
on our shopper.

ONLISH

Characteristics of
a shopper: width
35cm,
length 35cm,
handles, and
logo

ONLISH

Unlike plastic bags,
our shopping bags
help to save the
environment and
reduce plastic
pollution.

ONLISH

Our shoppers are
better than the rest,
as they are made
individually by hand
and with love,
without serial
production.

ONLYSH

Shoppers have an
affordable price.

ONLISH

In our video
courses we will
demonstrate how
to sew shoppers.

ONLISH

Buy our course
and you will learn
how a little to
help our world!

ONLISH

From the course
you will learn our
experience of
shoppers
creation.

ONLISH

**Let's save our
world
together!**
